- Summary: Build OpenAPI Specification document adheres to established best practices and standards.
- Tools: Reactjs, Typescript, Monaco Editor, Spectral-rulesets
- Outcome: Enhanced API documentation quality, reducing integration errors.

EXPERIENCE

SkillStorm - Full Stack Web & AI Developer

2021 - Present

- **LLM-Powered Chatbot:** Engineered a chatbot using LangChain for backend and React.js for frontend UI.
- **RAG Implementation:** Integrated retrieval-augmented generation with custom prompts and embeddings, ensuring high-quality, context-aware responses.
- **Integrated Monaco Editor:** Implemented a feature-rich editing environment with real-time feedback and syntax highlighting, enhancing user experience.
- **Implemented OAS Rules:** Integrated Spectral, an open-source API description linter, to enforce OAS (OpenAPI Specification) rules and custom rules, ensuring all documentation adheres to established best practices and standards.
- **Adaptability:** Demonstrated adaptability by quickly learning and integrating new technologies into existing workflows, ensuring the team stayed ahead of industry trends and best practices.
- **End-to-End Testing:** Developed automated testing frameworks using Playwright, reducing manual testing time by 50% and improving overall product reliability.
- **Collaboration:** Worked closely with UX/UI designers to implement design intents, emphasizing user-driven outcomes and improving customer satisfaction.
